IRS Collection** The principal source of collections by the IRS include individual income and profit taxes, corporation income and profit taxes, employment taxes, estate and gift taxes, and other taxes. From 1992 through 1996, the amount of taxes collected in each of these categories can be modeled by

$$T = 7,810,103.714t^2 + 61,813,629.34t + 1,116,758,213 \quad (\text{Total collected})$$
